## HAEMATOLOGY PERIPHERAL BLOOD SMEAR/ GBP

TEST DESCRIPTION	RESULT	REF. RANGE	UNIT
RBC Morphology	Few microcytes seen		
WBC Morphology	shows Neutrophilic leucocytosis		
Platelets	Platelets are adequate		
Atypical Cells/Blast Cells	absent		
Parasites	Absent		

### Interpretation:

Peripheral Blood Smear test is a type of blood test that involves looking at a sample of blood under a microscope to examine the appearance and characteristics of the blood cells.

- RBC: Changes in the appearance of the RBCs can indicate anemia or other medical conditions.
- WBC: Changes in the number or appearance of the WBCs can indicate an infection, inflammation, or other medical conditions.
- Platelets: An abnormal number or appearance of the platelets can indicate bleeding disorders or other medical conditions.
